Identifying a VFC-400 Digital Data Logger (DDL) Alarm

If your digital data logger's goes off, you might have an out-of-range temperature that puts vaccines at risk. **Here's how to identify an alarm:**

No alarm

Alarm

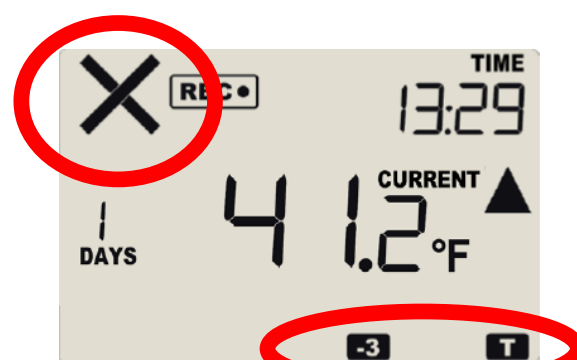

Can you Spot the Difference?

No alarm

- A checkmark in the upper-left corner
- No black boxes below temperature

Alarm

- X in the upper-left corner
- Black boxes below the temperature
