Vaccine Storage Temperatures for Refrigerators

Out of Range Temperatures

If vaccines experience an out-of-range temperature, they're at risk of no longer being effective. If you observe out-of-range temperatures or have an alarm on your digital data logger, you must take action:

- Consult your **Emergency Management Plan**.
- Label exposed vaccine "**do not use**," and store it under proper conditions as quickly as possible.
- Do not discard vaccines unless directed by the Philadelphia Immunization Program.
- Record the out-of-range temperatures and the room temperature in the "Action" area on the bottom of your paper temperature logs.
- Notify your vaccine coordinator and contact TempCheck (TempCheck@phila.gov, **215-685-6777**).
- Document all action taken.
